**New Partnership Reduces Exploding E-Discovery
and Document Review Costs; Produces Better Results**

Tusker Group tapped for FTI Partner Program

Austin, March 05, 2008— Texas-based Tusker Group has become a recognized service partner of FTI Consulting, Inc. and achieved certification on the Ringtail® global electronic discovery platform.

Tusker Group specializes exclusively in off-shore legal document review for corporate legal groups and their outside counsel. The first to implement dedicated, long-term project managers and legal professionals to individual clients, Tusker Group has provided reviewing and coding for clients who use Ringtail products for e-discovery since 2004.

“As the number of documents to be reviewed explodes, this partnership will decrease the costs associated with complex litigation,” notes Mike Dolan, CEO of Tusker Group. “We complement the front-end discovery provided by the powerful Ringtail platform; FTI Consulting’s customers now have the option to consolidate discovery and review with a single team, experienced in collaborating on the most difficult of cases.”

Tusker Group is a leader in complex litigation document review for a wide range of matters and industries, including: intellectual property, healthcare, energy, financial services and pharmaceuticals.

“We are pleased to have Tusker Group as a service partner, working for faster and more efficient document review,” said Ed Pfromer, senior managing director of alliances at FTI Consulting, Inc..

The Ringtail platform from FTI Consulting, Inc. delivers time and cost savings to lawyers and investigators working on large, complex matters. The Web-based technology scales to handle hundreds of users, thousands of cases and millions of documents in more than 200 languages.

The 2006 Socha-Gelbman Electronic Discovery Survey Report estimated electronic document discovery revenues to be about \$2 billion, up 51 percent from 2005. The survey anticipates the market to grow to \$4 billion by 2009. E-discovery software reduces the labor involved in sorting mountains of raw data used in today's legal battles.
